

PRODUCT FAMILY:

**SHL**

MAX. LOADING CAPACITY:

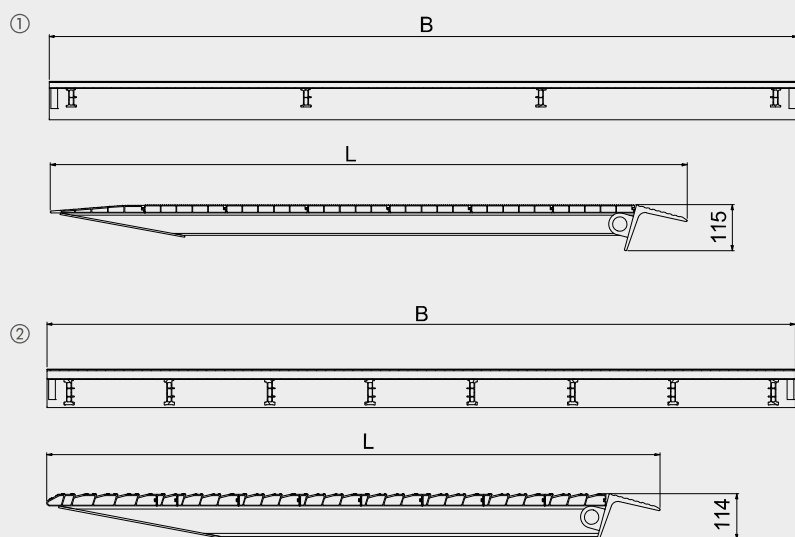

**8.000 kg**

The SHL range, made in length 1.5mt and width 2.2mt, has been specially designed to allow the overcoming of height differences from 100 to 300mm, such as containers, guaranteeing the maximum safety of transit of vehicles thanks to its width. The SHL1 and SHL2 models are characterized by a special non-slip surface, certified R13, and are suitable for loading manual trucks, manual and electric pallet trucks.

The SHL8 model is made of high-strength profiles and is designed to allow the loading of heavier vehicles, such as forklifts or operating machines with rubber wheels or tracks. All models are equipped with a standard head-connection that lays directly on the loading surface. The range is only available without raised edges.

**ANCHORING SYSTEMS:** Carabiner clip with steel chain (standard)

**HANDLING SYSTEMS:** Nylon handles (on request)
